

Rehberg Amendment #1

At the appropriate place in the bill, insert the following:

Sec. _____. None of the funds made available by this Act may be used by the Food and Drug Administration to write, prepare, develop or publish a proposed, interim, or final rule, regulation, or guidance that is intended to restrict the use of a substance or a compound unless the Secretary bases such a rule, regulation or guidance on hard science (and not on such factors as cost and consumer behavior), and determines that the weight of toxicological evidence, epidemiological evidence, and risk assessments clearly justifies such action, including a demonstration that a product containing such substance or compound is more harmful to users than a product that does not contain such substance or compound, or in the case of pharmaceuticals, has been demonstrated by scientific study to have none of the purported benefits.
