**Camp Statement on Individual Mandate Delay**

Washington, DC – Today, Ways and Means Committee Chairman Dave Camp (R-MI) made the following statement after the House passed permanent repeal of the physician payment fix, paid for by delaying ObamaCare's individual mandate penalty for five years.

"The President, realizing the failures of his health care law, has repeatedly delayed and exempted certain individuals, labor unions and businesses from the law's mandates and penalties. Just today, there is news the Administration may grant another extension for certain individuals in their law. If the President is willing to give relief to some, he and Democrats in Congress should be willing to give all Americans a reprieve from ObamaCare. It is only fair."
