PCORI Funding Announcements (PFA) Awards – Cycle I

Announced December 18, 2012

PCORI Funding Announcements (PFAs) are designed to solicit applications for proposals to support a portfolio of comparative clinical effectiveness research based on our [National Priorities for Research and Research Agenda](#). Each priority represents a line of research inquiry that addresses unmet needs of patients, their caregivers, clinicians and other healthcare system stakeholders in making personalized healthcare decisions across a wide range of conditions and treatments. Information on projects funded in Cycle I is provided below. Additional details on future funding cycles are provided in the PCORI website's [Funding Opportunities](#) section. All awards were approved by PCORI's Board pending a business and programmatic review by PCORI staff and completion of a formal award contract. More information on each awarded project will be posted after contract completion.
